# Names Index

The Names Index includes names of architects, authors, engineers, designers, planners, organisations, societies, etc. It does not include names of buildings, periodicals, trade names etc. Entries are made according to the Anglo-American Cataloguing Code. Corporate bodies are entered under the first letter of their names, e.g. Sir Basil Spence Bonnington & Collins is entered under 'Sir' and Harry Seidler & Assocs. under 'Harry'; however, if the name begins with initials, the entry is inverted, e.g. R. Seifert & Ptnrs is entered as 'Seifert (R) & Ptnrs'. No cross references are made from partners in an architectural practice to the full form. Each entry in the API is coded with a unique reference consisting of an alphabetical letter and four digit numerals. These code numbers appear in alphabetical and consecutive order. Reference in this index are to these code numbers.
